

Ingenjörsmässighet och färdighetsträning

Creo Parametric som läroplattform i
universitetsutbildningen

Agenda

- **Introduktion**
- **Teorier om lärande**
- **CAD i ingenjörsutbildningen vid LiU**
- **Möjligheter för framtiden**

Peter Hallberg

- Avd. för Maskinkonstruktion, LiU
- Univ. adj.
- Forskar på deltid
- Studierektor, exjobbskoordinator
- Programplanerare för Mi
- M
- ProE v.14...

Ingenjörsmässighet & färdighetsträning?

- Varför I o F?
- Mopeden
- Skolkrisen
- Breddad rekrytering
- Vad syftar I o F till -> anställningsbarhet om man frågar er...?
- För oss är det även minimera/maximera avhopp

TMKT94 Ingenjören & CAD-verktyget, 6hp

- Profilkurs för M och MI
- Även för
 - DPU (Design & Produktutveckling, 300hp)
 - EMM (Energi-Miljö-Management)
- Ca. 330 studenter
- Läses hela hösten

1st Period

2nd Period

UPG1

UPG2

UPG3

PRA1

Fairly simple...

A Sketching tech.

Individual

A Free picked model

Individual

A Optimized model

Individual

A bit harder...

B CAD drawing

Individual

B CAD product

Individual

B Optimized model

OPERATE

Technical communication
2D sketching and drafting
technique

Fundamentals of
feature based 3D
modelling technique

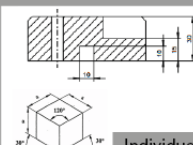

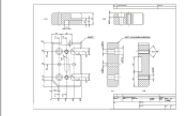

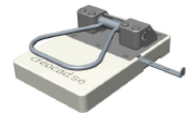

Analyzing functionality,
sensitivity-,
feasibility- and
optimization analyze

Appliance of achieved knowledge from 1st period

Syllabus overview (2/5)

- **Individual assignment 1 & 2:**
Basic modeling technique,
drafting and parametrization
(UPG1 & UPG2)

UPG1	UPG2
A Handritning  Individuell	A Egen CAD-modell  Individuell
B CAD-ritning  Individuell	B CAD-montage  Individuell

A4 European hole pattern

Trio hole pattern

Syllabus overview (3/5)

- Individual assignment 3:**
 Analyzing mechanisms, sensitivity-, feasibility- and optimization analysis

$$|M_x| = Fa + mg \left(\frac{L}{2} \right) \quad I_x = \frac{BH^3 - (B - 2t)(H - 2t)^3}{12} \quad S_{z \max} = \frac{M_x \cdot y_{\max}}{I_x}$$

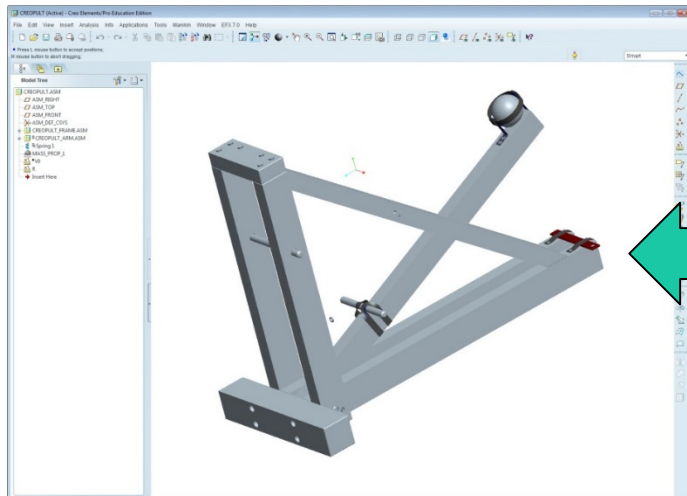

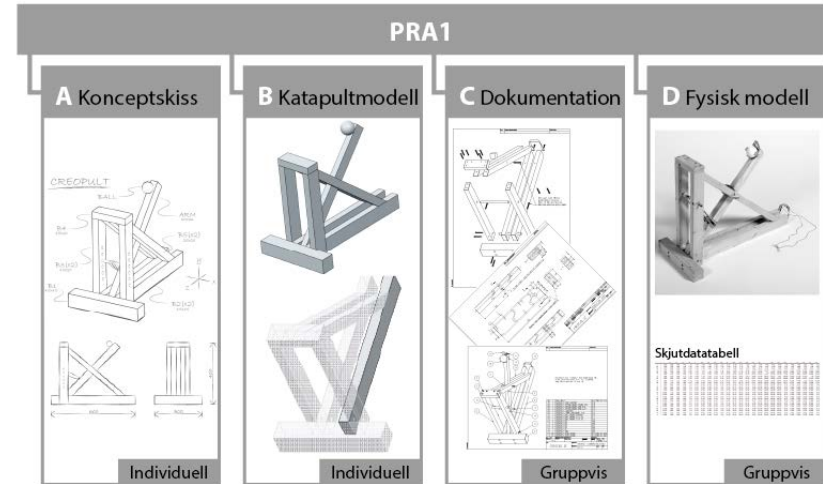

Syllabus overview (4/5)

- **Individual assignment 3:** Analyzing mechanisms, sensitivity-, feasibility- and optimization analysis

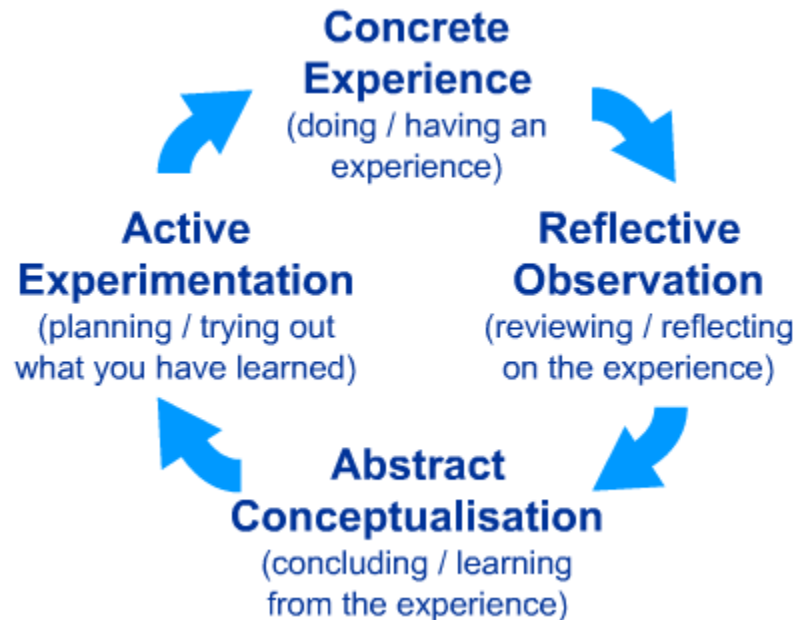

Syllabus overview (5/5)

- **Project assignment:**
Hands-on module that summarizes the previous modules
- Explore the connection between the digital model and its physical counterpart!

Why build something?

- Learning Theory
- Kolb's learning cycle – learning by doing

The hands-on module (1/12)

The challenge!

$$Poäng = 150000 - \frac{15(m + 10K)}{1 + T_1 + 2T_2 + 4T_3}$$

Available tools

Available materials

The hands-on module (3/12)

- Emphasis on a systematic approach with proper preparations

The hands-on module (4/12)

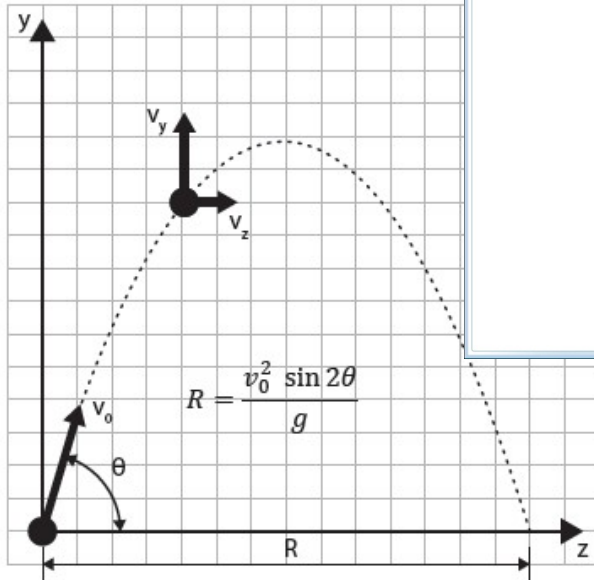

- Investigate and determine necessary inputs

$$k = \frac{F}{x} = \frac{9,23}{0,23 - 0,15} \approx 115 \text{ N/m}$$

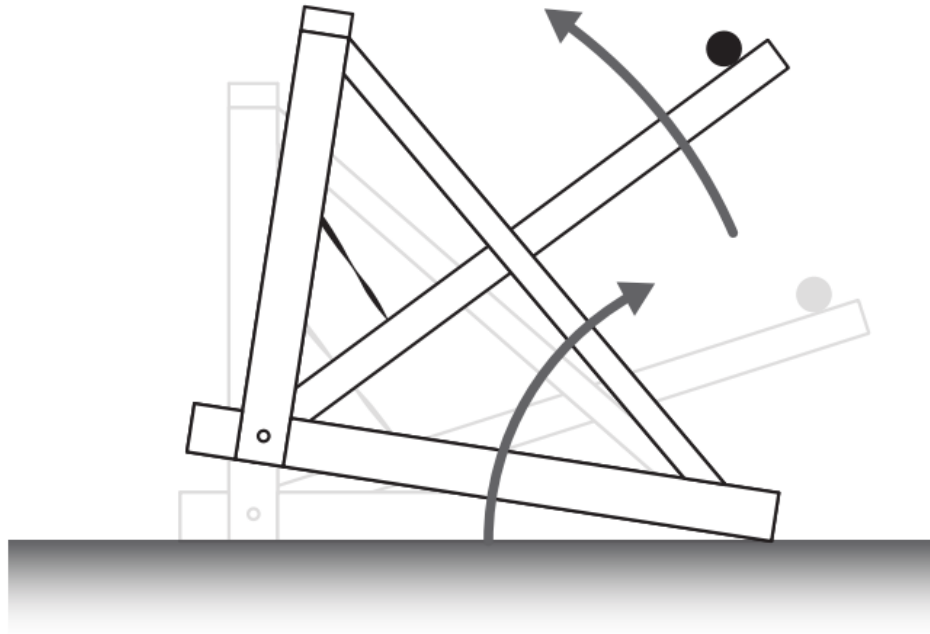

The hands-on module (5/12)

- Digital modeling - defining a model structure and necessary parameter respect

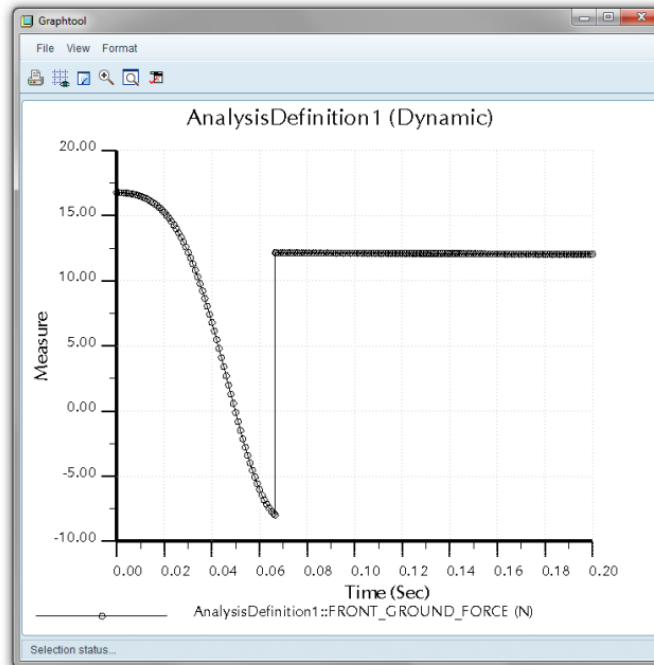

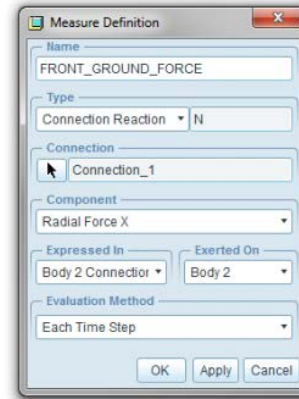

The hands-on module (6/12)

- Deal with the unexpected...

The hands-on module (7/12)

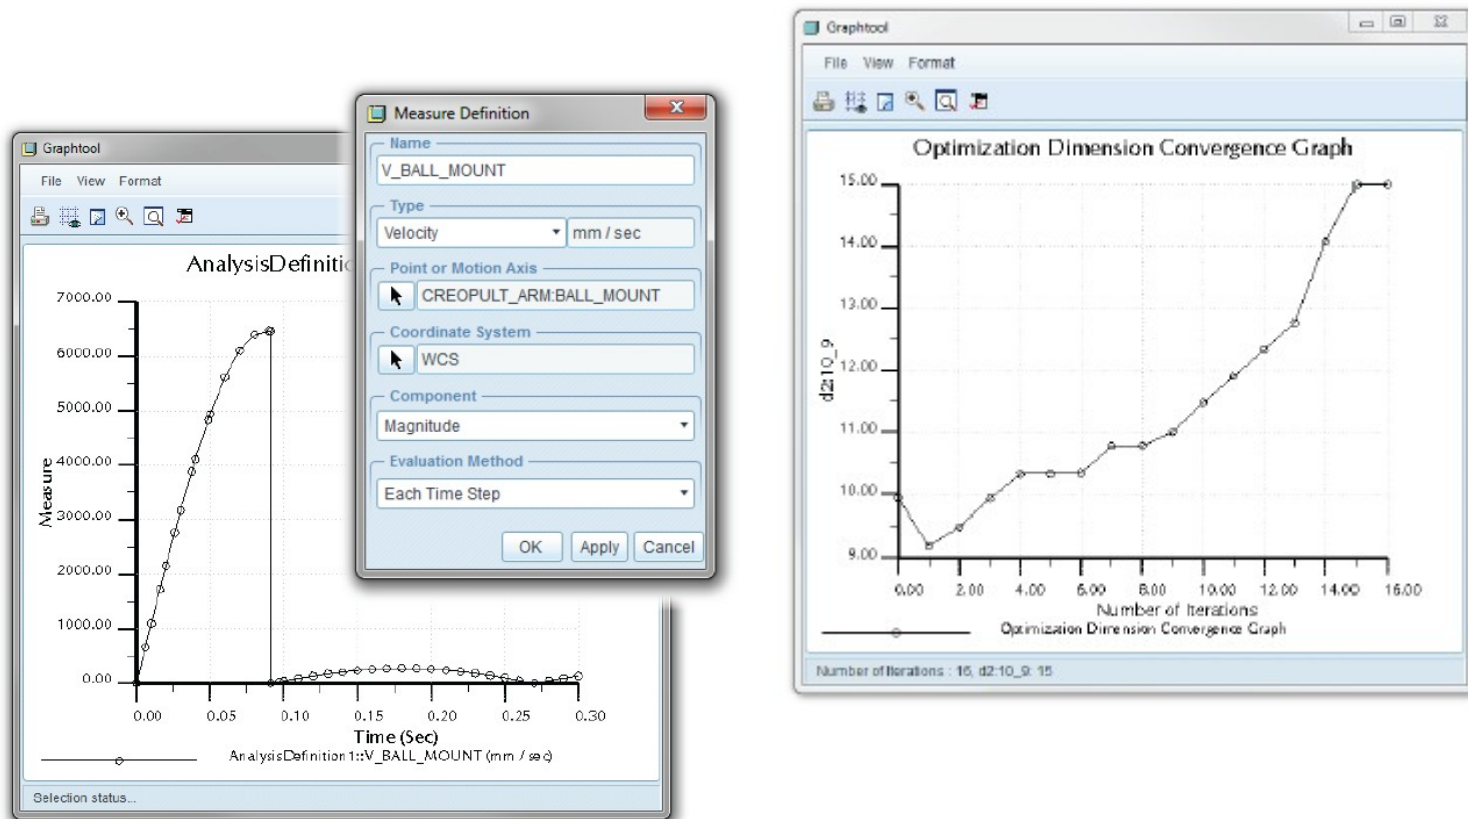

The hands-on module (8/12)

The hands-on module (9/12)

- Analyze and optimization

The hands-on module (10/12)

- Documentation and realization

The hands-on module (11/12)

$$Poäng = 150000 - \frac{15(m + 10K)}{1 + T_1 + 2T_2 + 4T_3}$$

	Mass (g)	Cost (SEK)	T1	T2	T3	Points
1	2380	278	0	1	2	130 650
2	2900	460	2	0	2	127 500
3	4450	311	1	2	1	127 320
4	2530	278	2	0	0	123 450
5	5100	241	2	0	1	121 838
6	3600	517	0	1	2	117 113
7	3400	320	0	2	0	117 000
8	6120	562	0	2	2	114 780
9	2100	523	0	1	1	113 350
10	1470	343	1	0	0	113 250

The hands-on module (12/12)

Key observations (1/3)

- Strong and obviously beneficial connection to learning theory and experiential learning ...and the CDIO initiative!

Key observations (2/3)

Emotional engagement
looks different when
going physical...

Key observations (3/3)

- Less *is* more!
- A challenge is ...challenging!
- Accuracy and linearity is a digital thing!
- A digital model calls for simplifications when used for analyzing
- Seeing is believing! (...and understanding of the digital model)

ics

TMKT73 CAD fk.

- **Fortsättningskurs för Maskiningenjörsprogrammet (180hp)**
- **Ca 70 studenter i åk2**

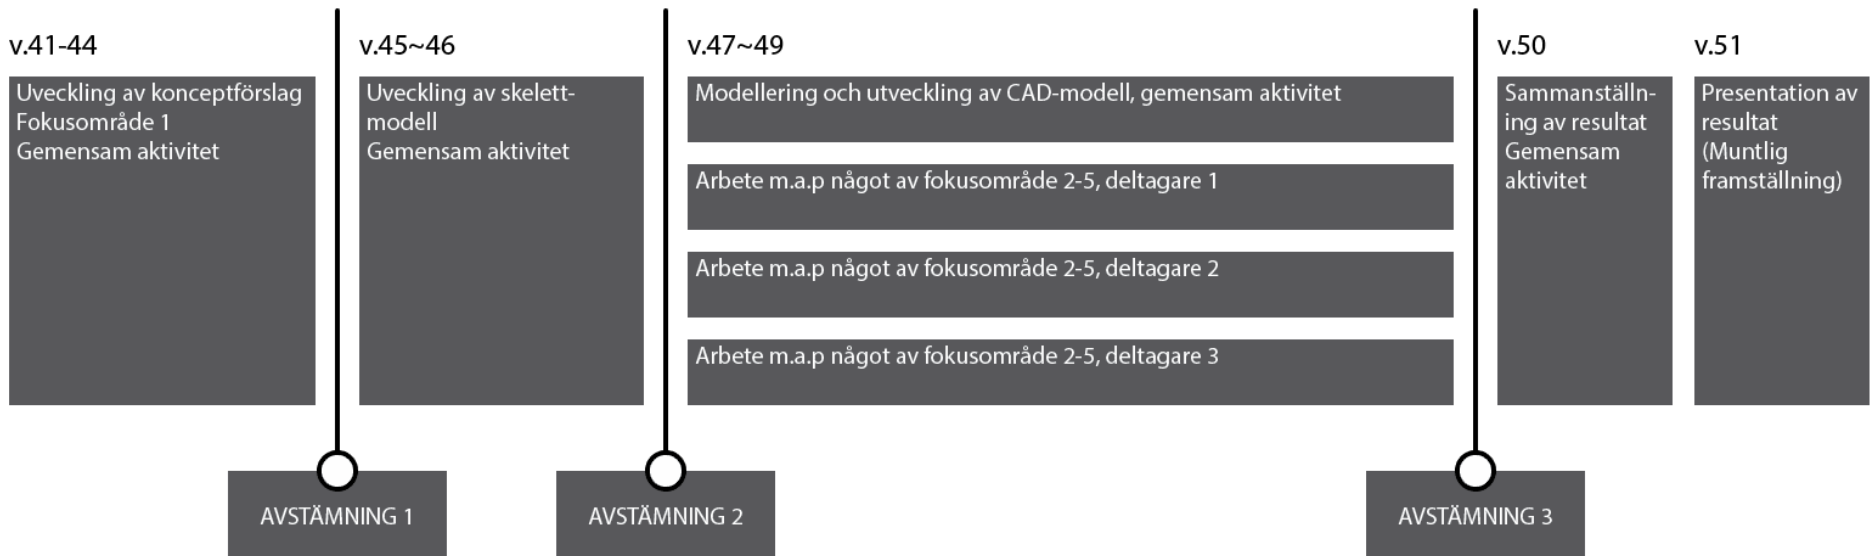

TMKT73 CAD fk. - översikt

- Avancerad modelleringsteknik
- Familjetabeller
- Program
- Skelett
- Rörliga skelett
- UDF
- PLM/PDM med Windchill
- Sammanfattande projekt

TMKT73 CAD fk. - projektet

- **Scenario: "Huvudleverantör vill kontraktera underleverantör"**
- **Examination**
 - Avstämningar
 - Produkt i Windchill
 - Muntlig redovisning

TMKT73 - Projektöversikt
